VertexFX Enhanced Performance with many new features as we continue our mission to listen and care for the customers' demands, never stops developing.

2021 - VertexFX Mobile Trader

Hybrid Solutions launched its own VertexFX Mobile Trading Apps for iOS and Android.

Company

Services

Our Multi-Asset Trading Platform structure is carefully studied and designed consists of a set of Application Servers Connected to an SQL Database, Client Terminals, and Dealing Room Applications can be hosted starting from the single server for small businesses to several servers to achieve load balancing for enterprises implementations to reach the optimum structure.

BackOffice Modules; The main management system that all clients and offices are connected to for asking or bidding quotes, where it is installed in the market maker or in the Bank dealing room, and through it continuous requests from the clients who are connected to this back-office dealing room will be received.

Client Modules; The client/broker module (Desktop, WEB, or Mobile Application IOS and Android) through which traders can trade with a specific Dealing room.

Application Servers, A set of applications servers hosted in one or more servers.

With the new business model improving nowadays, trading is no longer the classic forex one only, new modules have arisen and we have developed in VertexFX.

Physical Trading

VertexFX Social Trading is a service that allows VertexFX traders to follow VertexFX signals providers and copy their trades.

It requires the minimum or no knowledge about financial markets, VertexFX traders are only required to follow the suitable VertexFX signals provider, considering the percentage of successful operations and the diversification of the financial instruments traded by the expert providers, that is to say, that the VertexFX signals expert does not concentrate on single items or failing that.

VertexFX Social Trading allows VertexFX traders to trade online with the help of others. VertexFX traders can interact with each other, watch others take trades, then copy their trades and learn what prompted the top performer to take a trade in the first place. By copying trades, VertexFX traders can learn which strategies work and which do not work.

Social Trading

VertexFX Social Trading is a service that allows VertexFX traders to follow VertexFX signals providers and copy their trades.

VertexFX Social Trading allows VertexFX traders to trade online with the help of others. VertexFX traders can interact with each other, watch others take trades, then copy their trades and learn what prompted the top performer to take a trade in the first place. By copying trades, VertexFX traders can learn which strategies work and which do not work.

Here is why our customers love it

- Multi-level Account group hierarchical structure which enables Dealing room to build their groups in a way that gives infinite management capabilities for most of the system parameters per symbol per group.
- VertexFX will enable the Dealing room to manage their risk through implementing VertexFX Trader in the STP model either for all of the company or for part of it. VertexFX Risk Management Bridge is built to cover this need. VertexFX SQL database will give dealing room perfect integration capabilities supported by VertexFX API development kit.
- Online Trading for the public through Desktop, WEB, or Mobile Trading Terminals.
- VertexFX is a complete plug-n-play online trading system, neither Java Virtual Machine nor any other third party hardware or software is required to run the system and start trading.
- Customization capabilities of trading formulae, trading working hours, users, and security definition in a wide band of authentication levels in addition to customizable deal sizes.

Enriching the traders experience while he trade in the market using the vertexfx, equipped with hundreds of exceptional technical analysis tools

Proud of our customers and partners

We made it all through these years with leading customers and partners who enriched our journey with their experience and business demands, we look into each integration we created as our precious extension in the market, we grow together.

VeretxFX reached out to hundreds of Brokers, to a wide pool of Liquidity providers supporting the VerteXFX in their services to distributors and white label technology providers, all is a piece of art for us that we are gently taking care of.
